

Climate Comparisons:

1. Choose the city you live in – or another city in the United States.
2. Choose a second city that you would like to visit. (can be anywhere in the world)
3. Go to weather.com and look up a 10 day forecast for both cities. Record the High Temperatures for each city
4. Record your results in excel.
 1. Use the auto fill key to fill in the days of the week.
 2. Use for formatting skills to format the worksheet so you can read the data do NOT include the degree symbol – just type in the degrees Fahrenheit
 3. Make a line chart of the data comparing the two temperatures.
 4. Add your name to the heading – preview your document – set it to fit to one page or set your print area to include the data table and the chart.
 5. Print document
 6. Save the document to your x drive as climate comparisons.
